DETAILED ACTION

Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance:

Niikura (US 5,911,008) discloses an apparatus that detects shot boundaries in compressed video data (Niikura: column 1, lines 8-12). This apparatus comprises a "video source that provides a video sequence that includes a plurality of frames" (Niikura: figure 8, item 80, wherein the data is inputted from the video source), "frequency decomposer that generates low frequency components and high frequency components" (Niikura: column 18, lines 4-18, figure 15, wherein the DC component is the low frequency component. A high frequency component (AC) is generated, but Niikura chooses to only use the low or "DC" component), and a "cut detector" (Niikura: column 18, lines 43-44, wherein the shot boundary is the cut detector). Although Niikura does show a cut detector that identifies a cut using two adjacent I frames, Niikura fails to show using two adjacent frames as disclosed. Niikura also fails to show a fade detector, linear signal generator, and summing signal generator as claimed. A further search was conducted which failed to yield any prior art. Therefore, the prior art fails to teach or render obvious these limitations taken within the others in the claim.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
